

DEVELOPERS SURVEY

The Athens-Clarke County Community Tree Council (CTC) is evaluating the current tree protection program in Athens/Clarke County. We are a volunteer citizen board, and will be making recommendations to the Planning staff for changes in the Development Code to improve the County tree canopy cover. We would appreciate feedback from those who have gone through ACC's development process. Please share your experiences or suggestions below. Take more space if needed.

RESOURCES

1. Do you have a copy of the Athens-Clarke County's "Best Management Practices for Community Trees" book (3-ring binder)?
2. Have you used it? If so, what parts were most useful?
3. Would you make changes to the A-CC Tree Species List?

REQUIREMENTS

4. What do you think of current tree requirements that have to do with trees in the Development Code (% canopy cover, required caliper size, street tree spacing, parking lot trees, buffer trees, etc.?)

What works, and what doesn't? Please be specific.

ENFORCEMENT

5. What do you think of the county's enforcement of these rules?
6. What changes would you suggest?

Please return you comments in the envelope provided to Bob Barker, Program Coordinator, Athens-Clarke County Community Tree Council, 350 Pound Street, Athens, GA 30601
